Home Services Guideline

To whom it may concern:

When called to perform an inspection or consultation on site our personnel will invoice for this service on an hourly basis including travel time and any follow up time. We will provide written documents related to these activities whether it be a simple memo, a report, calculations, sketches or copies of photos.

As Professional Engineers acting in the interest of public safety, we will be held accountable for our actions, such as simple verbal advise based on Professional judgment. We therefore will charge for initial visits and, where further work is contemplated we will estimate follow-up work and obtain approval before proceeding.

We may make an effort to estimate the time and cost of a project based on a phone call, sight unseen, but we reserve the right to revise these estimates if conditions in the field differ from those described by the client in layman's terms.

Our billing rates vary depending on the personnel involved. We would be glad to quote our rates when you contact us.
